

Danilo Cabezas

Business Intelligence Solutions Architect | Power BI · Cloud (AWS)

Quito, Ecuador · 099 76 26 521 · dxcabezasg@gmail.com

PROFESSIONAL PROFILE

Senior Systems Engineer with 15 years leading technology, the most recent years focused on designing end-to-end data and Business Intelligence architectures — from the Cloud infrastructure that supports them to the final dashboard consumed by the business. Experience combining AWS instance administration, databases and advanced Power BI within a single role.

PROFESSIONAL EXPERIENCE

IT Manager / CTO (Chief Technology Officer) | Servifreno C.A.

2012 – 2016 · Quito, Ecuador

- Designed the enterprise reporting architecture in Power BI (a portfolio of 11 executive dashboards), integrating ERP data (Microsoft Dynamics Business Central 365) with SQL Server and MySQL sources.
- Managed the AWS cloud infrastructure supporting the organization's data systems and applications.
- Defined perimeter security standards (Fortinet) and endpoint protection standards (Kaspersky Security Center) to protect the data and infrastructure layer.
- Led the technical team responsible for maintaining the availability of data and BI systems, in remote and hybrid settings.
- Introduced AI agents (N8N, OpenAI, cloud code) as an additional automation layer on top of existing data flows, saving an average of 2 hours per automated report.

TECHNICAL SKILLS

BI & Data Architecture: Power BI (advanced), data modeling, SQL Server, MySQL | Cloud: AWS (instance administration) | Security: Fortinet, Kaspersky Security Center | ERP: Microsoft Dynamics Business Central 365 | AI: N8N, OpenAI, Copilot Studio

EDUCATION AND CERTIFICATIONS

Systems Engineering, major in Information Technology for Management — Universidad Politécnica Salesiana

Postgraduate Diploma in Artificial Intelligence — Universidad de las Américas (2025)

Certifications: Power BI Total (Udemy, 2025) · Copilot Studio – generative AI in Microsoft 365
